

# Sektionsseminar PHYSIK

## Sommersemester 2015

### dienstags, 13:00

Datum	Name	Thema	Ort
07.04.2015			Saal
14.04.2015	<b>BaltCoast kick-off meeting (BONUS project)</b>		Saal
21.04.2015	Dr. Martin Schmidt, Dr. Anja Eggert, Dr. Tim Junker	Temperature bias in a circulation model for the Benguela upwelling area and the implications for coupled ecosystem models	Saal
28.04.2015	<b>Briese-Preisverleihung</b>		Saal
05.05.2015			Saal
12.05.2015	Dr. Hilmar Hofmann (Limnologisches Institut, Universität Konstanz)	Abiotic conditions and their implications on sediment remobilization, spatio-temporal distribution patterns of dissolved methane and organisms in lakes	Saal
19.05.2015	Dr. John C. Warner (U.S. Geological Survey, Woods Hole Science Center, USA)	Geologic controls on shoreline change along Fire Island, NY.	Saal
26.05.2015	Dr. Johannes Becherer	Morphodynamic simulations of the Wadden Sea	Saal
02.06.2015	Prof. Dr. Hans Burchard	Buoyancy and wind influences on estuarine circulation in a tidally energetic channel	Saal
09.06.2015			Saal
16.06.2015	PD Dr. Angelo Rubino (Ca'Foscari University of Venice, Italy)	Some considerations on the dynamics of the Eastern Mediterranean Basin	Saal
23.06.2015	Dr. Tim Junker	t.b.d.	Saal
30.06.2015	Dr. Juliane Brust-Möbius	Spatial and temporal occurrence of Coccolithophores in the Northern Benguela upwelling system	Saal
07.07.2015	Dr. Ulf Gräwe	Anatomising one of the largest inflows into the Baltic Sea (December 2014) - a model exercise	Saal
14.07.2015	Dr. Janna Köhler (University of Bremen, Department of Oceanography)	Spatial and temporal fluctuations in the Atlantic internal wave field induced by energetic currents and the wind field	Saal
